PROFILE SUMMARY

Computer Science & Business Systems student with a CGPA of 8.56 and hands-on experience building full-stack web applications with the MERN stack and mobile apps with React Native. Built and deployed an AI-powered resume analyzer and a mobile game independently, working across backend APIs, databases, UI design, and live deployment. Comfortable picking up new tools quickly and enjoy solving real problems through code.

SKILLS

- Full Stack: React.js, Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, SQL
- Mobile & Languages: React Native, Expo, EAS Build, Python, JavaScript, HTML5, CSS3, Bootstrap
- AI & Tools: Google Gemini AI, Generative AI, Git, GitHub, Postman, VS Code, Vercel, Render
- Core Skills: Data Structures & Algorithms, Object-Oriented Programming (OOP)

PROJECTS

AI Resume ATS Analyzer | Full Stack Web App (MERN + Gemini AI)

Personal Project

- Built a full-stack resume analyzer using React, Node.js, Express, and MongoDB where users upload a resume PDF and get an ATS match score against a job description.
- Added JWT-based login and registration so each user's uploads and results stay private.
- Used pdfjs-dist to extract text from uploaded PDF resumes, then compared it against job description keywords to calculate a compatibility score.
- Connected the app to Google Gemini AI to generate missing-skill analysis and suggestions for improving resume bullet points.
- Deployed the frontend on Vercel and the backend on Render, with MongoDB Atlas as the cloud database.

SpaceEscapeRunner | Mobile Game (React Native + Expo)

Personal Project

- Built a 2D endless-runner mobile game from scratch using React Native and Expo, including the game loop, collision detection, and animations.
- Used AsyncStorage to save high scores locally so progress isn't lost between sessions.
- Built and tested an Android APK using EAS Build, then published the project on GitHub.

Intelligent Computer Vision System for AI-Based Multi-Object Detection

Academic Project

- Built a computer vision model to detect and identify multiple objects in images using deep learning.
- Worked on improving detection accuracy and recognition speed through image preprocessing and model tuning.

EXPERIENCE / INTERNSHIP

Python with Data Analytics Intern | Mechpro Technologies | Jun 2025

- Learned practical Python data analysis techniques during a hands-on data analytics internship.
- Cleaned and explored real-world datasets, then used Pandas, NumPy, and Matplotlib to analyze and visualize the results.

EDUCATION

Bachelor of Technology, Computer Science and Business Systems | Anna University, Coimbatore | Aug 2023 - May 2027

- CGPA: 8.56 / 10

CCBP 4.0 Academy – Genius | Nxtwave's CCBP 4.0 Academy | Apr 2025 - Dec 2027

- Related learnings: GenAI, Web Development, Full Stack Development, Python, SQL, React.js, Node.js, Git, Data Structures and Algorithms.

Higher Secondary Education | Govt. Higher Secondary School, Bommahalli, Dharmapuri | May 2023

- 10th - 90% | 12th - 75%

CERTIFICATIONS

- NPTEL - Database Management System (DBMS) | Nxtwave - Introduction to Databases (SQL)
- Nxtwave - Build Your Own Static and Responsive Website (HTML, CSS, Bootstrap, Flexbox)
- Nxtwave - Programming Foundation with Python
