PROFILE SUMMARY

Computer Science & Business Systems student with a CGPA of 8.56 and hands-on experience building full-stack web apps (MERN), AI-agent-driven automation systems, and mobile apps with React Native. Independently built and deployed an AI automation platform, a resume analyzer, and a mobile game, working across backend APIs, databases, real-time systems, and live deployment.

SKILLS

- Full Stack: React.js, Next.js, Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0, MongoDB, SQL
- Mobile & Languages: React Native, Expo, EAS Build, Python, JavaScript, TypeScript, HTML5, CSS3, Bootstrap
- AI & Real-Time Systems: Google Gemini AI, Generative AI, Multi-Agent Systems, Socket.io, BullMQ, Redis
- Tools & Core: Git, GitHub, Postman, VS Code, Vercel, Render, Data Structures & Algorithms, OOP

PROJECTS

AgentFlow AI — Multi-Agent AI Automation Platform — *Personal Project*

[GitHub](#) [Live Demo](#)

- Built a full-stack platform (Next.js, Node.js, MongoDB) that turns plain-English prompts into executable workflows, run by a 5-agent AI system (Planner, Execution, Validation, Recovery, Monitoring) with automatic retry and recovery.
- Integrated real OAuth 2.0 connections with Gmail, Slack, Discord, and Google Sheets, added real-time execution tracking with Socket.io and background job queuing with BullMQ + Redis, and deployed on Vercel + Render.

Smart Traffic Prediction & Emergency Route Optimization — *ZEAI Hackathon – Team Lead*

[GitHub](#) [Live Demo](#)

- Led a 4-member team to build a real-time traffic prediction and emergency-route optimization platform using React, TypeScript, Node.js, and Socket.io for live map and congestion visualization.
- Used OSRM and SUMO for real route calculation and realistic traffic simulation on Coimbatore's road network, with Google Gemini AI for congestion explainability.

AI Resume ATS Analyzer (MERN + Gemini AI) — *Personal Project*

[GitHub](#) [Live Demo](#)

- Built a full-stack resume analyzer (React, Node.js, Express, MongoDB) that scores an uploaded resume PDF against a job description, with JWT-based login for private user accounts.
- Used Gemini AI to generate missing-skill analysis and resume improvement suggestions; deployed the frontend on Vercel and backend on Render with MongoDB Atlas.

Other Projects:

- SpaceEscapeRunner — 2D endless-runner mobile game (React Native + Expo, published as Android APK) ·
- Intelligent Computer Vision System — multi-object detection using deep learning (IEEE paper, Academic Project)

EXPERIENCE / INTERNSHIP

Python with Data Analytics Intern | Mechpro Technologies | Jun 2025

- Cleaned and analyzed real-world datasets using Pandas, NumPy, and Matplotlib, applying practical Python data-analytics techniques.

EDUCATION

Bachelor of Technology, Computer Science and Business Systems | Anna University, Coimbatore | Aug 2023 - May 2027

- CGPA: 8.56 / 10

CCBP 4.0 Academy – Genius | Nxtwave's CCBP 4.0 Academy | Apr 2025 - Dec 2027

- Related learnings: GenAI, Full Stack Development, Python, SQL, React.js, Node.js, Git, DSA.

Higher Secondary Education | Govt. Higher Secondary School, Bommahalli, Dharmapuri | May 2023

- 10th - 90% | 12th - 75%

CERTIFICATIONS

- NPTEL - Database Management System (DBMS) | Nxtwave - Introduction to Databases (SQL)
- Nxtwave - Build Your Own Static and Responsive Website (HTML, CSS, Bootstrap, Flexbox)
- Nxtwave - Programming Foundation with Python
